

TECHNICAL DATA SHEET

Lerloy 808 Tweezers – Fine Angled Tips & Improved Grip – Celcon®

Product Overview: Engineered for high-dexterity work, these fine-tipped Celcon tweezers are the industry standard for watchmakers and optical technicians. The specialized angled geometry, combined with a precision-ground flat interior surface, ensures a secure, positive grip on the smallest components without the risk of marring or scratching delicate surfaces.

Technical Specifications

FEATURE	DETAILS
Material	Premium Celcon® Copolymer
Design	Fine-angled tips with flat interior for superior grip
Primary Applications	Professional watchmaking, precision optics, and microelectronics
Surface Safety	Non-marring and non-scratching for delicate surfaces
Quantity	Pack of 12 (New Condition)
